

Innova does not stop Growing

We start this 2nd moment by citing the words that Innova CEO **José Antonio Luque** said some months ago: *"We have not stopped, we have kept our services, even improving them. In the future we will have many more opportunities and we will keep on hiring people and adding talent to our teams."* He was right.

At Innova **the greatest value is you, the professionals that make up the company**, a multidisciplinary team of over **300 people** which keeps on growing day by day.

The bet on talent is still a corporate goal. For this reason, even in such a turbulent year where lockdown has challenged us in countless ways, **Innova has not stopped hiring employees for its different teams and offices.**

In 2020, **40 people** joined our teams in **Madrid, Barcelona, London, Bogotá** and **Mexico City**

New profiles

The pandemic caught us all off-guard early this year. Nevertheless, we can say the response of the whole company has been exemplary.

It is irrefutable we are living through **times of continuous changes** which have compelled us to foster our capacity for improvisation and constant real-time adaptation. In short, we are going new situations which call for changes in our **corporate strategy** and a search for new ways of developing business. And for this reason, the creation of "new profiles" at Innova has been an important pillar which allow us to carry this change out and face the **new needs** together with the rest of professionals that make up Innova.

Where in the company will they help?
