

Under the difficult current circumstances and in view of the new challenges posed by the pandemic for international activities, at Innova we reassert our trust in all the employees' work and commitment.

Almost **four years** have passed since we started our activity in the UK, opening the office in London and it has grown little by little but at a steady pace.

We have been gaining a foothold in the British market since then, succeeding in being a consolidated consulting company, especially for the utility and banking sector. This London adventure has involved hard work and this year is a clear result of this effort.

In 2020, Innova-tbs has **consolidated existing customers, extending the services it provides** and has closed important projects with **new customers**, such as **Elexon** and **LOANITT**.

At the same time, the team has been reinforced with **new professionals** and **new profiles** have been created to meet new needs.

Innova's presence in the UK is increasingly strong. We are turning into a more competitive company, adapting to an increasingly changing and complicated environment.

Innova-tbs's 2020 has been, in short, a year of stabilisation and consolidation of customers, partners, projects and services in a **complicated global context** and in a country where this health crisis has hit very close to home.

Let's keep at with the good work!

2019
