

OUR CUSTOMERS

"This year we have faced many challenges with our customers, but since the first moment, we put all the necessary protocols into action to continue providing services to our customers and creating new ways of getting closer to new customers.

We have relied on what has always been effective: our customers, our team and our partners. I think our success has been to keep the quality of our work, to understand our customers' new needs and concerns and, especially, to be very close to them in spite of physical distance." **José Antonio Luque**, Innova's CEO.

In this sense, we succeeded in generating **new services** with the customers we already had and in obtaining **new opportunities** with **new customers**.

2021 will be a year of **opportunities and new challenges**.

We will keep on generating new solutions, projects and lasting relationships.
