

More than two years have passed since the first Infriday was held and they have been 22 already. It is obvious it has been an initiative which has consolidated with time, whose response by all the employees have been better and better.

In this new year we will continue sharing our use cases and solutions in a close and professional environment which allows to broaden our vision of them, identify expert interlocutors and have the opportunity to go more in depth about the topics presented in the lectures.

Due to the circumstances, this 2020 most of them have had to be online. Even so, in the distance, we have held **7 Infriday sessions**, thanks to the work of our colleagues:

- **Infriday XXII RepsolEyG STADIA a successful case of Infrastructure as Code and Architecture**

Date: 4 December | Speaker: **Jorge San Martín**

- **Infriday XXI - Benchmark BI tools – Sprinter**

Date: 18 September | Speaker: **Fernando Aragón**

- **Infriday XX - Customer hypersegmentation with consumption data**

Date: 17 July | Speakers: **Paola Díaz** and **Alicia González**

- **Infriday XIX - Xoserve's DE: Service and Data Exploitation Platform of the Gas Industry in the UK with SAS DIS**

Date: 10 July | Speakers: **Miguel Pina** and **Carlos Panadero**

- **Infriday XVIII – Carat: optimisation and assignation of advertisements in commercial breaks**

Date: 8 May | Speaker: **Cristina Pascual**

- **Infriday XVII - Implementation of Adobe Campaign Standard**

Date: 3 April | Speaker: **Emiliano Escoda** and **Ignacio Barahona**

- **Infriday XVI - Text mining with R**

Date: 10 January | Speakers: **Loubna Khalifi** and **Sergio Marín**
