

CARBON FOOTPRINT CALCULATION REPORT and VERIFICATION by EQA SPAIN

CARBON FOOTPRINT AND RECOGNITION

Ministry for Ecological Transition and Demographic Challenge Seal (Spain)

As part of the commitments made by Innova-tsn in the block dedicated to the environment, the company has worked on a tool that would allow it to obtain an accurate picture of the greenhouse gas emissions generated by its activity in order to carry out planning that could contribute to reducing the organization's carbon footprint. To this end, in the first four months of 2023, Innova-tsn's carbon footprint for the years 2019, 2020, 2021 and 2022 was calculated and, in July, submitted to the measurement verification process with the accredited entity EQA.

Subsequently, the verification of the carbon footprint for these years was registered in section a) of the Carbon Footprint and commitments to reduce greenhouse gas emissions of the Spanish Office for Climate Change of the Ministry for Ecological Transition and the Demographic Challenge. In November of the same year, the right to use the "I CALCULATE" seal for the years 2019-2021 and the "I CALCULATE AND REDUCE" seal for 2022 was granted, which also applies to all Innova-tsn offices in Spain, thus recognizing the effort made by the organization as a whole to reduce the company's emissions.

Registration entails a commitment to present an emissions reduction plan, embodied in the Innova-tsn 2023-2026 Plan, which aims to develop and implement a low-carbon strategy to reduce our footprint and improve the environmental performance of our organization, deepening our commitment to the environment and emissions reduction.

The measurement and verification process has been repeated in 2024 on emissions for the year 2023.
